

## PRESS RELEASE

Company profile GfG Dortmund, Germany

### **Technology for people and the environment**

Since the beginning in 1961, GfG has positioned itself as the leading specialist for gas detection and gas warning technology in the market. This position is enhanced by investment in technology and innovation.

The knowledge of GfG's specialists means that detection solutions are possible for the most difficult applications. GfG's international subsidiaries ensure that our customers receive the very highest levels of product and support wherever they are in the world.

GfG is a world leader in gas warning and measurement technology. For nearly 50 years, GfG has specialized in the development and manufacturing of high quality, robust and safe gas warning systems and sensors.

GfG manufactures a wide range of both portable gas monitors and fixed gas measuring systems, which are capable of detecting and measuring a large number of different gases. Our instruments can detect even the smallest gas leaks with highly sensitive and specific sensors to provide early warning for the protection of people and plant.

### **Custom-made solutions**

GfG products are designed for practically all applications where gas detection may be required, including: automotive, chemical and petrochemical, gas transmission and distribution, industry, shipping, power generation, food production, steel manufacture, mining, nuclear energy, construction, landfill operation, water and sewage management, fire-brigades, rescue services, hospitals, research institutes and universities – in fact any area where people and plant need to be protected from gas hazards.

GfG scientists work in close co-operation with leading research institutes, combining our 50 years of experience in gas detection with the latest technology to offer our customers the best solutions to their gas detection needs.

### **World-wide Reach**

GfG is a truly international company, able to support our customers in any part of the globe. GfG has manufacturing facilities in Germany, Switzerland, South Africa and
